NINELEAPS CODING CHALLENGE

This project is my solution done as a fulfilment for next round of Interview.

Tools used:

- **Programming Languages:** HTML,CSS,PHP,Mysql.
- **Server:** wampp local server
- **Database:** Mysql (PHP my Admin)

Web Site- Map:

- index.php -> This is the first page and consists of a login form.
- Dashboard.php->This page offers various options to be performed.
- Add.php -> This Page Adds new employee into database.
- Table.php->This page views all employees in a table.
- List.php->This Page displays hierarchy structure of Employees.

NOTE:

- Default Login username: deepa and Password: admin

PREREQUISITES:

- **WAMPSERVER Version 3.1.0 64bit**
- **BROWSER**

STEPS TO RUN:

- ➢ Download and install WAMP SERVER
- ➢ Paste the website directory folder(acme) to C:\wamp64\www\
- ➢ Open browser and follow steps below:
    - o Enter-> localhost/phpmyadmin
    - o Default username->root
    - o Password is blank and Server choice is MySQL
    - o Create a database named "hr"
    - o Import hr.sql file from the downloaded folder
    - o Once sql has been imported successfully open new tab and enter->
      localhost/acme
    - o Web page will load and default username is deepa and password is admin.
